CTCA® offers a comprehensive Women’s Cancer Center that encompasses a full spectrum of oncology care for cancers unique to women, including:

- Breast cancer
- Ovarian cancer
- Fallopian tube cancer
- Endometrial cancer
- Cervical cancer
- Uterine cancer
- Vulvar cancer
- Vaginal cancer
- Gestational trophoblastic disease

Our team is committed to keeping referring physicians updated on patients’ statuses through HIPAA-compliant communications, as well as appropriately and deliberately transitioning patients back into their care upon treatment completion.

CTCA Atlanta Women’s Cancer Center

CLINICAL TEAM

Anita Johnson, MD, FAC  
CTCA Breast Program Director;  
Chief of Surgery and Director of Breast Surgical Oncology, CTCA Atlanta

Ruchi Garg, MD  
CTCA Gynecologic Oncology Program Director

Natalie Godbee, DO  
Gynecologic Oncologist

Haritha Pabbathi, MD  
Medical Oncologist

John McKnight, MD  
Medical Oncologist

Sean Cavanaugh, MD  
National Chair, CTCA Department of Radiation Oncology

Lily Shakibnia, MD, MSc, DABR, FRCPC  
Chief of Radiation Oncology

Frederick Durden, MD  
Plastic and Reconstructive Surgeon

Henry Krebs, MD  
Interventional and Diagnostic Radiologist
TREATMENTS AND TECHNOLOGIES AVAILABLE

Our fellowship-trained physicians and clinical specialists treat women’s cancers with great attention to symptoms and focus on optimizing patients’ quality of life utilizing multiple clinical resources, treatments and technologies.

HIGH-RISK AND CANCER SCREENINGS

DIAGNOSTICS
- PET/breast MRI/ultrasound
- Sentinel lymph node biopsy (intraoperative sentinel lymph node injection)
- Breast diagnostics
  - Digital breast tomosynthesis with biopsy
  - MRI-guided breast biopsy
  - Wire-free localization
  - Radio-pathology concordance evaluation
  - Diagnostic staging studies with biopsy
- Gynecologic
  - CA-125 test
  - Hysteroscopy, dilation and curettage
  - Loop electrosurgical excision procedure (LEEP)
  - Cold knife cone biopsy
- CT-guided biopsies
  - Anesthesia support for procedures
  - Vulvar and vaginal biopsies and wide local excisions

HIGH-RISK ASSESSMENT

GENETIC COUNSELING AND TESTING

MEDICAL ONCOLOGY
- Neoadjuvant and adjuvant chemotherapy
- Neoadjuvant and adjuvant endocrine therapy
- Adjuvant hormone therapy
- Immunotherapy

PRECISION MEDICINE
- Comprehensive genomic profiling
- Liquid biopsy
- Genomic-targeted therapies
- Precision medicine resource center

RESEARCH/CLINICAL TRIALS
- Phase 1b/phase II trials
- Phase III trials
- Molecularly-based (precision medicine) trials
- Cooperative group trials

FERTILITY COUNSELING AND PRESERVATION
- Fertility evaluation
- Fertility-sparing treatment

SURGERY
- Breast surgery
  - Breast conservation surgery with oncoplastic reconstruction
  - Hidden scar technique
  - Nipple-and areola-sparing mastectomy
  - Skin-sparing mastectomy
  - Sentinel lymph node biopsy
  - Targeted axillary lymph node dissection
  - Downstaging of the axilla with neoadjuvant chemotherapy
  - Coordination with radiation oncologist for IORT/APBI
  - Surgical prophylactic mastectomy for high-risk patients
  - Surgical management of high-risk lesions and benign breast disease
  - Body image consults

PATHOLOGY
- Second opinions
- Intraoperative tissue evaluation

LYMPHEDEMA MANAGEMENT
- Multidisciplinary approach to lymphedema prevention, early detection and management, including treatment by licensed lymphedema specialist

RADIATION ONCOLOGY
- Comprehensive radiation oncology techniques for the management of breast and gynecological malignancies
  - Conventional 3D conformal external beam radiation therapy (EBRT)
  - Intensity modulated radiation therapy / Volumetric modulated arc therapy (IMRT/VMAT)
  - Image guided radiotherapy (IGRT)
  - Hypofractionated radiation (HF-RT)
  - Intraoperative radiation therapy (IORT)
  - Deep inspiration breath hold (DIBH)
  - Prone breast board radiotherapy
  - Stereotactic body radiotherapy (SBRT)
  - Interstitial breast brachytherapy
  - Accelerated partial breast irradiation
  - Intracavitary gynecologic brachytherapy

INTEGRATIVE AND SUPPORTIVE SERVICES
- Survivorship
- Nutritional support
- Prehabilitation and post-op rehabilitation
- CORE: Cardiac-oncology rehabilitation program
- Pelvic floor therapy
- Naturopathic support
- Behavioral health (including mind-body, music therapy, meditation)
- Lymphedema patient education and screening
- Pastoral care
- Breast cancer navigators and oncology licensed social workers
