The CyberKnife® Robotic Radiosurgery System
A non-invasive treatment for cancerous and non-cancerous tumors in the body, including the prostate, lung and brain. CyberKnife delivers high-dose radiation to tumors in short periods of time. Radiation options, like CyberKnife, can provide an alternative for patients who have inoperable or surgically complex tumors.

CyberKnife Treatment List:
- Acoustic neuroma
- Arteriovenous malformation
- Bone metastases
- Brain metastases
- Glioblastoma multiforme
- Gliomas
- Isolated recurrences in lung
- Kidney tumors
- Liver metastases
- Lung tumors
- Meningioma
- Metastatic brain and spinal lesions – Oligodendroglioma
- Ocular/Orbital tumors
- Pancreatic cancer
- Pituitary adenoma
- Primary liver tumors
- Prostate cancer
- Recurrences in a previously irradiated lung field
- Spinal tumors
- Trigeminal neuralgia
Radiation Oncology Team

Adam Dickler, MD
Radiation Oncologist
MEDICAL DEGREE
Rush Medical College, Chicago, IL
RESIDENCIES
Transitional Year – Ravenswood Medical Center, Chicago, IL
Radiation Oncology – Rush University Medical Center, Chicago, IL

Neil Mehta, MD
Radiation Oncologist
MEDICAL DEGREE
Rush Medical College, Chicago, IL
RESIDENCIES
Internal Medicine – Rush University Medical Center, Chicago, IL
Radiation Oncology – University of Chicago, Chicago, IL
