Lung Cancer Facts

- Leading cause of cancer death among both men and women\textsuperscript{1}
- Studies have shown that screening high-risk individuals with low-dose CT scans could reduce lung cancer mortality by 20 percent\textsuperscript{2}

Lung Cancer Screening

**HIGH-RISK INDIVIDUALS**

As of July 2020, the U.S. Preventive Services Task Force (USPSTF) recommends proposed annual screening for lung cancer with a low-dose CT scan for adults who:

- Are aged 50 to 80 years
- Have a 20 pack-year smoking history (Number of packs smoked per day multiplied by the number of years smoked)
- Currently smoke or have quit within the past 15 years\textsuperscript{3}

Cancer Treatment Centers of America\textsuperscript{®} (CTCA) offers services for lung cancer screening and diagnosis. Screenings are available to adults who meet the above criteria via low-dose CT scan.
DIAGNOSTICS
Our screening and diagnostic programs offer the following:

- **Quick Appointments** Patients are usually seen the same week of referral.
- **Rapid Results** Screening results are provided to both the patient and referring provider.
- **Access to Specialists** Should your patients need additional follow-up, CTCA® offers quick access to board-certified interventional radiologists and pulmonologists, as well as medical oncologists and thoracic surgeons.

TREATMENT
If your patient is diagnosed with lung cancer, we are happy to collaborate with you on their treatment. CTCA skilled physicians offer a multidisciplinary, evidence-based management of care that combines advancements in genomic testing, precision cancer treatment, minimally invasive surgery, radiation, immunotherapy and chemotherapy. At the same time, we support patients' overall well-being with therapies designed to enhance their quality of life while managing side effects during and after treatment.

Contact our team to refer a patient or for additional information about CTCA. Please send patient information via fax or encrypted email.
